Telescoping Pole Comparison

Choose a setup for your real rooms, head, and storage space.

My regular jobs and clear standing position

Job 1 / surface: _____

Job 2 / surface: _____

Check before buying	Option A	Option B
Model / instructions found		
Actual pole length range		
Collapsed storage length		
Weight with head / adapter		
Lock type / ease of operation		
Exact head and connector fit		
Replacement head / parts		
Price / returns to check		

Before each use

- ☐ Read the manual; use approved heads and extension limits.
- ☐ Clear level floor; move fragile items; keep children and pets away.
- ☐ Inspect tubes, locks, connector, and head joint while lowered.
- ☐ Fit and lock as instructed; check control before surface contact.
- ☐ Keep feet flat; reposition rather than lean or stretch.
- ☐ Stop for slipping, loose parts, discomfort, or poor control.

Leave the job for another plan if:

There are wires, electrical equipment, unknown cables, or unsafe access.
You cannot guide the head from a clear, level floor without stretching.
The tool is damaged, the connection is uncertain, or force is needed.

My decision / questions: _____

Shopping and setup aid only. Follow the exact tool and surface instructions.
