

# Family Floor Cleaning Checklist

Start with one useful path. Follow your floor guide and cleaner label.

Room: \_\_\_\_\_ Floor and finish: \_\_\_\_\_

Approved method or care-guide location: \_\_\_\_\_

Cleaner instructions and waiting time: \_\_\_\_\_

## Daily or as needed

- ☐ Clear walking paths and collect ordinary loose toys.
- ☐ Pick up visible hair and grit with a surface-approved tool.
- ☐ Check entrances, dining areas and pet-bed edges for mess.
- ☐ Handle spills or accidents promptly using the correct instructions.

## Weekly reset

- ☐ Choose one room or route; give children and pets a dry place elsewhere.
- ☐ Remove loose debris; vacuum accessible areas and edges.
- ☐ Treat spots using the surface care guide.
- ☐ Clean hard floors only as their guide permits; use a clean pad if suitable.
- ☐ Check mats and removable rugs, including the surface beneath them.

## Before reopening the area

- ☐ Complete required contact time, rinsing and waiting steps.
- ☐ Let the floor and permitted cleaned mats dry fully.
- ☐ Remove equipment and used cloths from the walking route.
- ☐ Secure products in labeled original containers; check the closure.
- ☐ Care for pads and equipment according to their instructions.

## If the reset is missed: return to one clear path and any urgent mess.

Never mix cleaners. An ordinary dry vacuum is not for wet pet accidents.

No universal drying time or cleaner suits every floor and animal species.

Adjust this household plan to traffic, weather, shedding and surface needs.
