# Heated Towel Rail Care Checklist

Exterior bars only. Your model and finish instructions take priority.

Model / finish: _____
Manual location: _____
Allowed method / products: _____

## 1. Before cleaning

- ☐ Follow the manual to switch off / isolate. Prevent automatic restart.
- ☐ Let the rail cool fully; remove towels when safe. Keep the floor dry.
- ☐ Stop for a loose rail, leak, damaged cable, or damaged finish.

## 2. Wipe gently

- ☐ Use a clean, soft cloth, lightly dampened and wrung out away from the rail.
- ☐ Wipe reachable exterior bars with light pressure; use a clean cloth area.
- ☐ Keep water away from connections, controls, valves, and openings.
- ☐ No sprays, rinsing, steam, abrasives, or unapproved cleaning products.

## 3. Finish before normal reuse

- ☐ Dry accessible bars with a separate soft cloth. Remove permitted residue.
- ☐ Check for remaining moisture or faults. Do not use heat to dry connections.
- ☐ Restart only when dry, fault-free, and permitted by the manual.

## Keep for next time

Date cleaned: _____ Next check: _____
Marks / questions for the manufacturer: _____
_____

Do not open covers, adjust valves, bleed, drain, or remove the rail. If moisture enters an electrical part or a fault is suspected, keep it off and seek qualified help.

Based on model-specific care guidance; see the accompanying article for sources.
