

Rainy-Season Cleaning Checklist

Small steps for mud, wet gear, damp and musty smells

Use the full article for material-specific methods and safety guidance. Check off only the tasks your home needs.

After a wet arrival

- ☐ Put shoes in a tray; keep the exit clear.
- ☐ Blot visible water and lift loose mud.
- ☐ Open bags and space wet coats and shoes to dry.

Each day during wet weather

- ☐ Lift the entry mat and check the floor beneath.
- ☐ Empty trays and replace saturated mats.
- ☐ Spot-clean muddy marks with a floor-approved method.
- ☐ Check that towels, shoes and coats are drying.
- ☐ Check humidity and wipe ordinary condensation.
- ☐ Finish drying laundry before starting more.

Once a week, and after heavy rain

- ☐ Clean mats and trays according to their care instructions.
- ☐ Check accessible sills and room edges for new damp.
- ☐ Maintain drying equipment as the manual directs.
- ☐ Record and report recurring stains, leaks or musty smells.

Low-energy version

- ☐ Water up. Wet gear drying. Walking route clear.

For ordinary rain-day housekeeping only. Do not mix cleaners. Follow surface and fabric care instructions. Begin drying water damage immediately; seek help for contaminated water, major damage, suspected hidden mold, or damp that will not dry.
