WASHABLE CURTAIN

Stain care-check & treatment log

For a grape juice splash. The curtain and product labels come first.

1 CHECK THE ENTIRE PANEL

Panel / room:

Wash method and temperature limit:

Lining / backing restrictions and drying instructions:

- ☐ Water washing confirmed for the complete panel.
- ☐ Treatment permitted; hidden-hem test checked after drying.

Stop if the label is unknown, dye lifts, or the backing changes.

2 RECORD ONE TREATMENT AT A TIME

Date / fresh or older stain:

Product used and label-directed dilution / amount:

Label-directed contact time / actual start and rinse time:

Result after rinsing / any color or texture change:

3 FINISH SAFELY

- ☐ Blotted gently and supported the panel; no scrubbing or wringing.
- ☐ Washed / rinsed only as the curtain instructions allow.
- ☐ Inspected the mark before drying heat or ironing.
- ☐ Recorded the next step; stopped if damage or dye loss appeared.

Next step / details to tell a professional cleaner:

Never mix stain removers. Keep products and soaking water away from children and pets. A remaining stain is not permission to bleach.
