TEMPERATURE CARE CARD

Choose the method before the water.

One card per item, surface, or set of matching instructions.

Item / surface and exact brand or model:

Care label / manual / manufacturer page:

Approved cleaning method and cleaner:

Water temperature / limit stated by the maker:

Moisture, soaking, steam, or handling restrictions:

Rinse / drying / before-use instructions:

BEFORE YOU START

- ☐ I matched the item, cleaner, and equipment instructions.
- ☐ The method is permitted; damage or uncertainty means pause.
- ☐ Hot cookware has cooled as its instructions require.
- ☐ Children and pets are away; products stay labeled and separate.
- ☐ I have the right tool and a safe finishing / drying space.

No universal temperature fits every job. Do not add water to hot glass. For blood on wet-cleanable everyday fabric, check the care label and start with cold water. Do not apply that method to every delicate fabric.
